Product Portfolio

Quality is our main ingredient

We grow well. Together

avgust 
crop protection

Avgust is the leader of the Russian chemical crop protection industry. We've built our reputation as a strong partner thanks to our capacity to reliably supply products of the highest quality. Our facilities form one of the leading pesticide production enterprises in all of Eastern Europe.

A high degree of automation and expanded use of robotics ensure the reliability of production processes, high quality, and the safety of products.

The production processes of different product groups are separated from each other which prevents product contamination by adjacent production. The use of load-cell scales and artificial intelligence ensures that raw materials are dosed with extreme accuracy and the formulation of chemicals is completely controlled.

Quality control is provided 24 hours a day at all stages of the production cycle by the plants' scientific centers. The modern instrumentation base allows researchers to both study trial batches of new chemicals and to control the quality of already produced plant protection products.

The confidence we have that clients can fully trust the Avgust name raises us to a leading market position and sets us apart from the competition.

We invite you to review our expanded portfolio of proven herbicides, fungicides, insecticides, desiccants and plant growth regulators that deliver exceptional performance and value.

Raising your expectations

Avgust is the leader of the Russian chemical crop protection industry.

We strive to make our products not only match the leading solutions on the market, but to have improved characteristics that increase their effectiveness.

We offer our clients so much more than just a basic selection of chemicals. In fact, what distinguishes us most is our commitment to developing innovative solutions, from unique combinations of active ingredients to newly created formulations.

We are proud to introduce the best of them under this section.

We grow well. Together

avgust 
crop protection

Idicum

SEED TREATMENT

iprodione, 133 g/l
imidacloprid, 100 g/l
difenoconazole, 6,7 g/l

Delivering the power of three chemistries, Idicum provides potato growers with an effective protection against early-season insects and diseases.

Vial Trio

SEED TREATMENT

prochloraz, 120 g/l
thiabendazole, 30 g/l
cyproconazole, 5 g/l

Vial Trio combines three different fungicide chemistries to deliver an unmatched level of protection against the widest spectrum of early-season pathogens.

Tercia

SEED TREATMENT

prochloraz, 60 g/l
triticonazole, 20 g/l
azoxystrobin, 10 g/l

Offering a unique systemic and contact protection against early-season diseases of wheat and barley, Tercia promotes fast-emerging plants and uniform stand establishment.

Quickstep

HERBICIDE

clethodim, 130 g/l
haloxyfop-R-methyl, 80 g/l

An ultimate grass weed control with a unique combination of best-in-class active ingredients. With its patented formula of oils and surfactants, Quickstep is a premium weed control option in various row crops.

Lastik Top

HERBICIDE

fenoxaprop-P-ethyl, 90 g/l
clodinafop-propargyl, 60 g/l
cloquintocet-mexyl (antidote), 40 g/l

With two active ingredients Lastik Top delivers a market-leading broad-spectrum grass control.

With an excellent crop safety and application flexibility it is a top choice for cereal growers.

Fabian

HERBICIDE

imazethapyr, 450 g/kg
chlorimuron-ethyl, 150 g/kg

With Fabian you'll get a proven, relentless control of the toughest broadleaf weeds and grasses. An enhanced residual activity and application flexibility provide a season-long weed control, for clean fields through the end of the season.

Bomba

HERBICIDE

tribenuron-methyl, 563 g/kg
florasulam, 187 g/kg

A robust control of the most common economically damaging broadleaved weeds in a wide application window. An economical and easy-to-use weed control solution with an excellent crop safety.

Cohort

HERBICIDE

bentazone, 330 g/l
fomesafen, 150 g/l

Cohort is specially formulated to deliver a fast knockdown and a reliable residual activity against the widest spectrum of troubling broadleaf weeds as well as some grasses and sedges in your beans.

Creutser

HERBICIDE

nicosulfuron, 650 g/kg
thifensulfuron-methyl, 60 g/kg
florasulam, 40 g/kg

Strong on broadleaf weeds and grasses, but gentle to the crop, Creutser combines three proven active ingredients, and is an excellent choice for "foundation" post-emergence control of yield-robbing weeds in corn.

Fulltime

HERBICIDE

mesotrione, 75 g/l
nicosulfuron, 37,5 g/l
picloram, 17,5 g/l

A robust combination of three highly effective active ingredients with knockdown and residual activity, Fulltime gives corn growers a solution for one-pass grass and broadleaf weeds control with a single product.

Gecata

FUNGICIDE

tetraconazole, 60 g/l
difenoconazole, 120 g/l

A powerful fungicide mixture combining the best-in-class control of powdery mildew and a wide-spectrum activity against a wide range of fungi including Alternaria, Anthracnose, Cercospora, on a number of fruits & vegetables. Formulated as Microemulsion.

Inside

FUNGICIDE

fluazinam, 200 g/l
dimethomorph, 200 g/l

Through multi-site modes of action, Inside provides an unsurpassed control of oomycete fungal plant pathogens (Late blight, Downy mildew, etc) without encouraging resistance development.

Stylet

INSECTICIDE

indoxacarb, 100 g/l
abamectin, 40 g/l

A powerful insecticide, specifically designed for use against many Lepidopteran pests (armyworms earworms, cutworms, corn borers, bollworm, looper moths, etc.).

Scarabey

INSECTICIDE

diflubenzuron, 300 g/l
esfenvalerate, 88 g/l

Proven insect growth inhibitor (IGI) in combination with a fast knock-down activity - Everything you need for an effective moth control.

Borey Neo

INSECTICIDE

alpha-cypermethrin, 125 g/l
imidacloprid, 100 g/l
clothianidin, 50 g/l

With a combination of three different active ingredients, Borey Neo combines a fast knockdown effect with a long-lasting residual protection against sucking and chewing pests in a wide range of crops.

Seed Treatments

| Vial Trio | SC | cyproconazole, 5 g/l + thiabendazole, 30 g/l + prochloraz, 120 g/l |
| Vial Trust | SC | tebuconazole, 60 g/l + thiabendazole, 80 g/l + antistress components |
| Vitaros | SC | carboxin, 198 g/l + thiram, 198 g/l |

Successful crop protection starts with seeds.

At Avgust, we strive to develop seed treatments that optimize your seeds performance.

Our seed treatment portfolio offers the most diversified line of products, which protect crops from insect pests, diseases or abiotic stresses (e.g. drought), improve germination, seedling vigor, plant stand and healthy root systems, so your plants have the strongest start.

Herbicides

Every grower knows weeds interfere with a crop growth, reduce the quality of valuable crops and limit yield potential.

Weeds also damage crops in a secondary way, serving as hosts for a variety of insects and fungi.

The broad selection of herbicides offered by Avgust provides growers with customizable weed control solutions to fight the weeds that threaten your crops.

Fungicides

Our lineup of fungicides deliver consistent control of the toughest diseases in a variety of crops and are proven to minimize the yield losses, helping growers protect crops throughout the growing season and bring healthy crops to harvest.

With the Avgust portfolio of fungicides powered by a variety of modes of action, growers can expect fields with higher yield and return on investment potential.

Insecticides

We grow well. Together

avgust 
crop protection

There are hundreds of insects that can cause serious damage to crops. Even a small insect infestation can significantly reduce yields and the quality of crops.

Avgust's insecticides provide control for a broad spectrum of damaging pests in a variety of crops and are a good fit for Integrated Pest Management (IPM) and Insecticide Resistance Management (IRM) programs.

| Product | Formulation | Active ingredient |
|------------|-------------|---|
| Aliot | EC | malation, 570 g/l |
| Aspid | SC | thiacloprid, 480 g/l |
| Borey | SC | imidacloprid, 150 g/l + lambda-cyhalothrin, 50 g/l |
| Borey Neo | SC | alpha-cypermethrin, 125 g/l + imidacloprid, 100 g/l + clothianidin, 50 g/l |
| Break | ME | lambda-cyhalothrin, 100 g/l |
| Enlil | EC | diazinon, 600 g/l |
| Herold | SC | diflubenzuron, 240 g/l |
| Mamba | EC | alpha-cypermethrin, 150 g/l |
| Matrin Bio | SL | matrine, 5 g/l |
| Scarabey | SE | diflubenzuron, 300 g/l + esfenvaterate, 88 g/l |
| Scutum | SC | fipronil, 250 g/l |
| Sempay | EC | esfenvaterate, 50 g/l |
| Sharpey | ME | cypermethrin, 250 g/l |
| Sirocco | EC | dimethoate, 400 g/l |
| Stilet | OD | indoxacarb, 100 g/l + abamectin, 40 g/l |
| Taira | EC | chlorpyrifos, 480 g/l |
| Tanrek 500 | SC | imidacloprid, 500 g/l |

Defoliant and Desiccants

We grow well. Together

avgust 
crop protection

| Product | Formulation | Active ingredient |
|---------------|-------------|---|
| Avguron Extra | SL | thidiazuron, 360 g/l + diuron, 180 g/l |
| Sukhovey | SL | diquat, 150 g/l |
| Tornado 540 | SL | glyphosate acid (potassium salt), 540 g/l |

Defoliant and desiccants are used to help accelerate the drying of plant tissues, remove foliage that may interfere with harvest, thereby homogenize crop maturity and increase harvest efficiency.

Our defoliant and desiccants help to preserve yield, minimize quality losses and ensure you get the most from your crops.

Plant Growth Regulators

We grow well. Together

avgust 
crop protection

| Product | Formulation | Active ingredient |
|---------|-------------|-------------------------------|
| Reggy | SL | chlormequat chloride, 750 g/l |
| Traffic | SL | maleic hydrazide, 270 g/l |

Plant Growth Regulators (PGR) are crop enhancement products that help in managing the crop canopy, reduce lodging, control sprouting and improve the marketable quality of the crop.

Avgust's Plant Growth Regulators positively benefit and modify the plants growth and development helping you to optimise your plants performance, so your crops can reach their maximum yield this coming harvest.

A partner you can trust

We grow well. Together

avgust 
crop protection

Avgust is a reliable pesticide supplier to more than just Russian consumers. We have also successfully developed a long-term, trust-based relations with our clients in dozens of countries around the globe.

All that would be impossible without the contribution of our respected partners. Working collaboratively with our partners is essential to building and maintaining a strong business.

We collaborate with competitive distributors and dealers who add value for Avgust and our customers, helping them to correctly select and apply our products, develop optimal strategies for their use depending on any situation that might arise in the field.

Our team is always ready to provide excellent support to your sales & marketing units, and always available to help you with tech questions, product training, or troubleshooting.

If you are interested in doing business with us, and/or need more information about our products, please don't hesitate to call or send us an email.
